

Copy content, Copy friends:

Understanding and Augmenting the Power of Social Sharing

through *Pinterest*

Social sharing provides a alternate, trusted source of information (and can start revolutions)

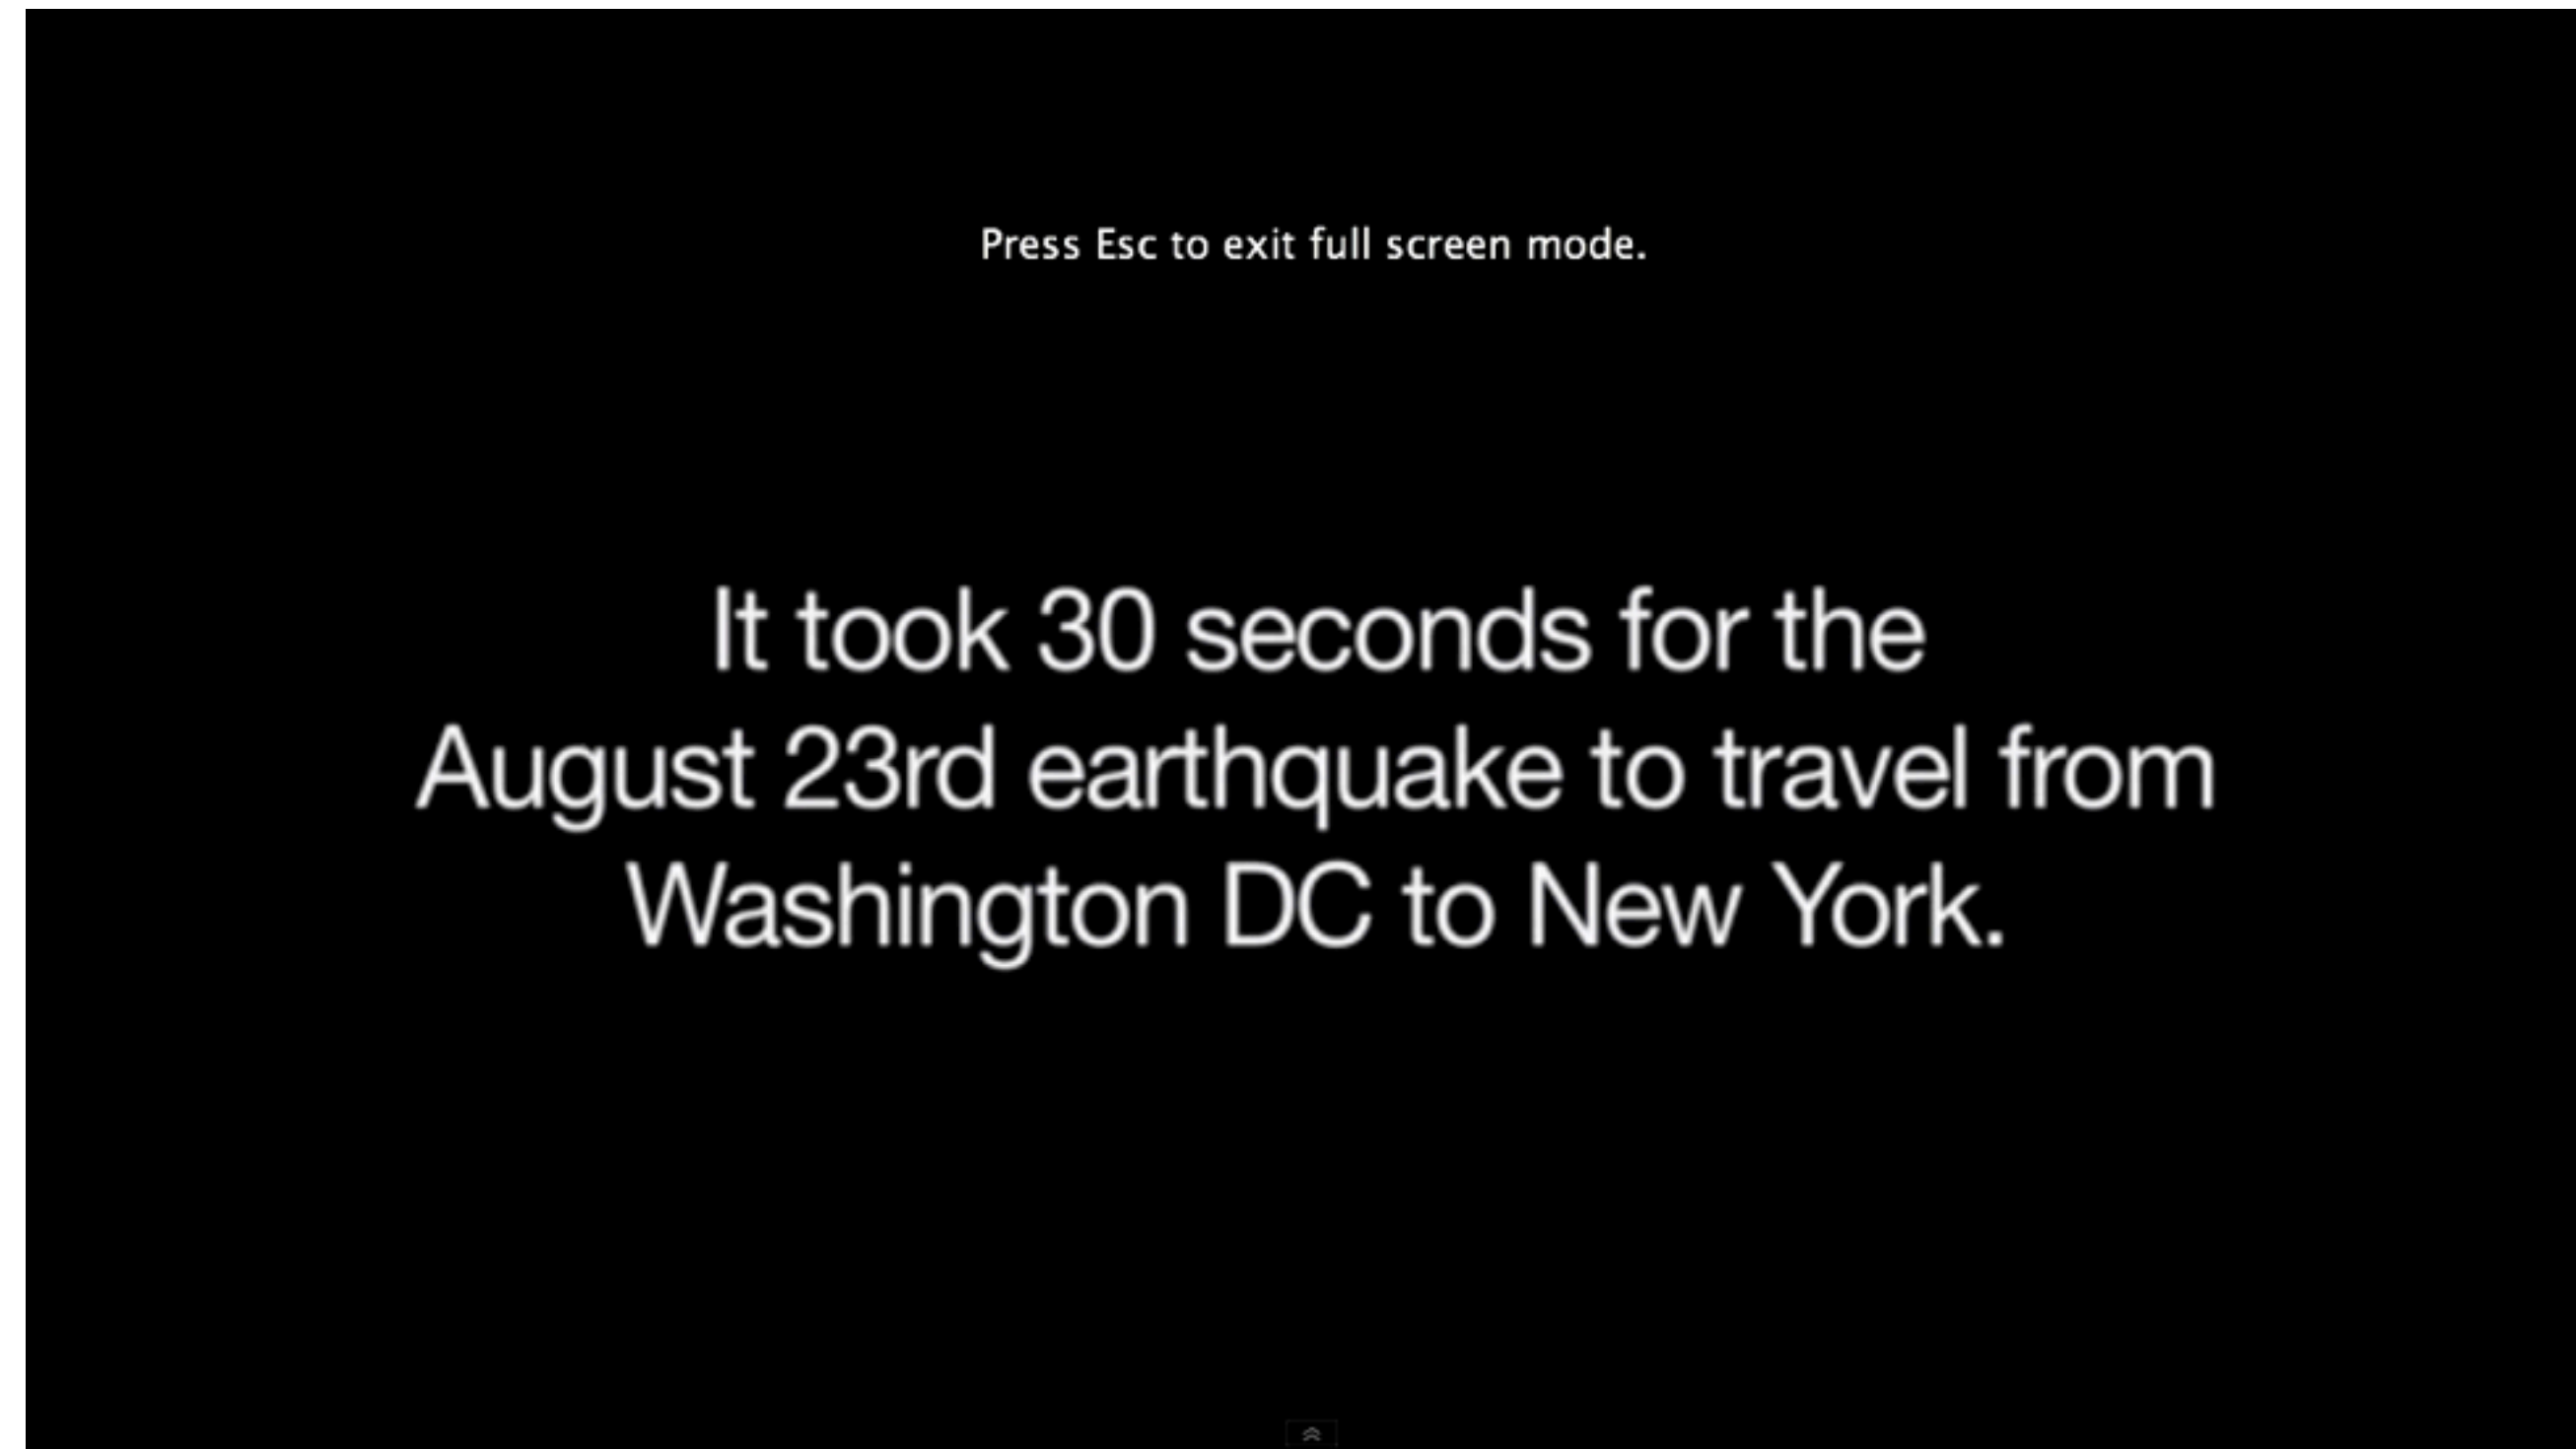

Social sharing is quick

Social sharing is quick

Websites derive significant value from social sharing

- >46% of first-day views (and 25% of all views) to YouTube videos are “social” referrals and embeds (Broxton et al, 2011)
- 31.2% of traffic in Q4 2014 to Shareaholic’s network sites.

<https://blog.shareaholic.com/social-media-traffic-trends-01-2015/>

Websites derive significant value from social sharing

- >46% of first-day views (and 25% of all views) to YouTube videos are “social” referrals and embeds (Broxton et al, 2011)
- 31.2% of traffic in Q4 2014 to Shareaholic’s network sites.

<https://blog.shareaholic.com/social-media-traffic-trends-01-2015/>

Benefit of social: crowdsourced content discovery

Pinterest: A good case study

- Content Curation:
 - 50 billion pins (images) collected by people onto more than 1 billion boards (@Pinterest*)
- Social Bootstrapping
 - ~60% (40m/68m) of users connected with Facebook**

* <https://twitter.com/Pinterest/status/582960872093556736>

** According to our dataset

We appear to be at an inflection point...

<http://insights.buzzfeed.com/industry-trends-2014/>

We appear to be at an inflection point...

<http://insights.buzzfeed.com/industry-trends-2014/>

But is this a step forward or backward?

“Searching” Historical Parallels

People have been making lists from the beginning

(1992)

This gargantuan guide offers reviews and listings of thousands of websites... over 10,000 entries. Reviews include a synopsis of the website, the website address and occasional screen shots of the site. Each section also includes the editors top pick ... included CD-ROM also contains the website's addresses and reviews.

Some of the topics covered in the World Wide Webpages include animals, business, education, gardening, health, music, parenting, relationships, sports and travel....A handy book to have in front of you while you are surfing the Net.

Idea: Make a Website catalog,
not a book — No more editions!

Globally unpopular but **niche interest** content is highlighted.
“Curation comes up when search stops working”

- Clay Shirky

Niche interest content is important to many

Niche interest content is important to many

Niche interest content is important to many

Head seekers

Niche interest content is important to many

Head seekers

Tail seekers

Tail likes vs. head likes

- Tail likes are geographically more diverse
 - ★ Likers may not have offline context
 - ★ No common traditional media either (given different countries)
- Viral propagation more common

Tail likes vs. head likes

- Tail likes are geographically more diverse
 - ★ Likers may not have offline context
 - ★ No common traditional media either (given different countries)
- Viral propagation more common

Social network support important for the tail!

Why do people take the effort to curate manually?

Online survey: 33 Pinterest users (270 Last.fm users)

- 85% for personal scrapbooking
- 48% for displaying content to others

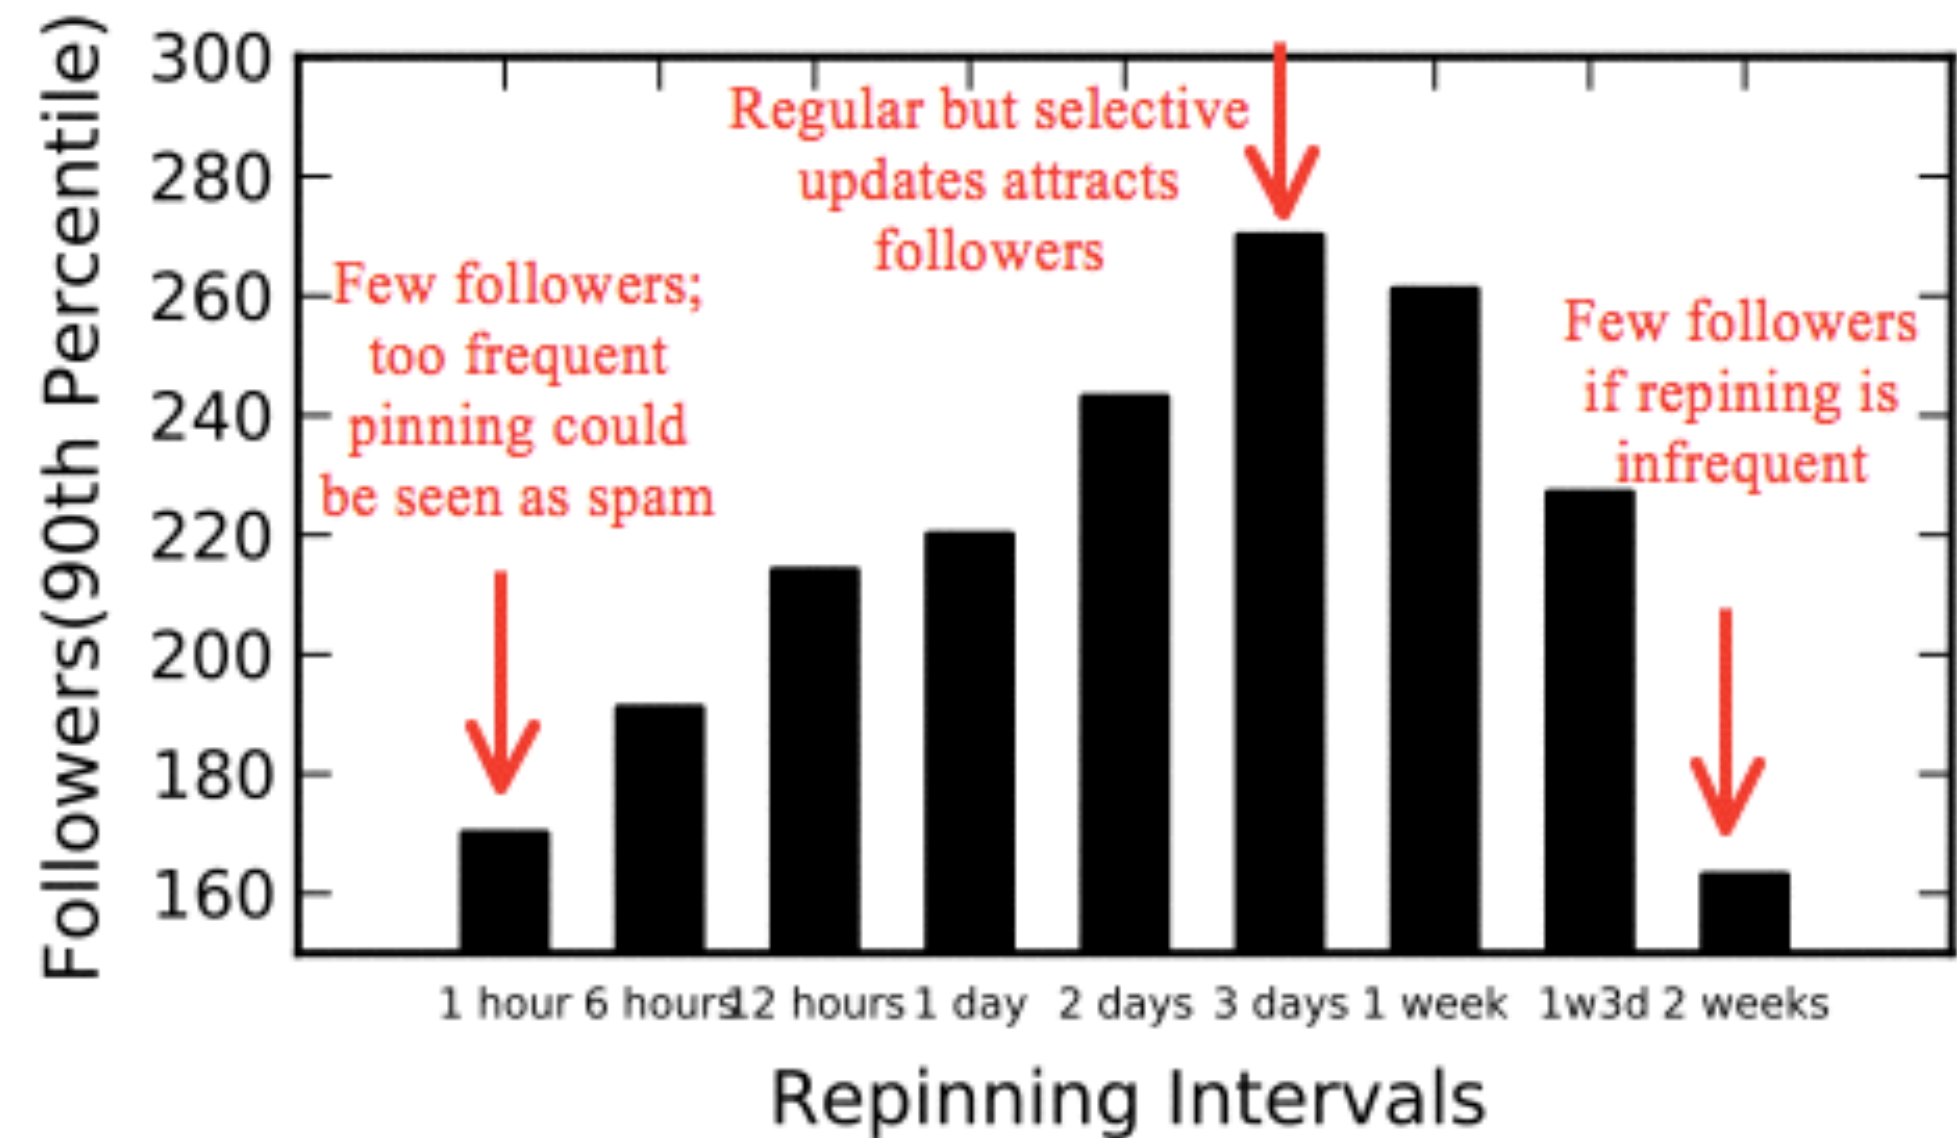

Why do people take the effort to curate manually?

Online survey: 33 Pinterest users (270 Last.fm users)

- 85% for personal scrapbooking
- 48% for displaying content to others

Many curate for **personal/private** reasons! (Not necessarily social)

All the same, there may be social side-effects

Manual social recommendation has pros and cons

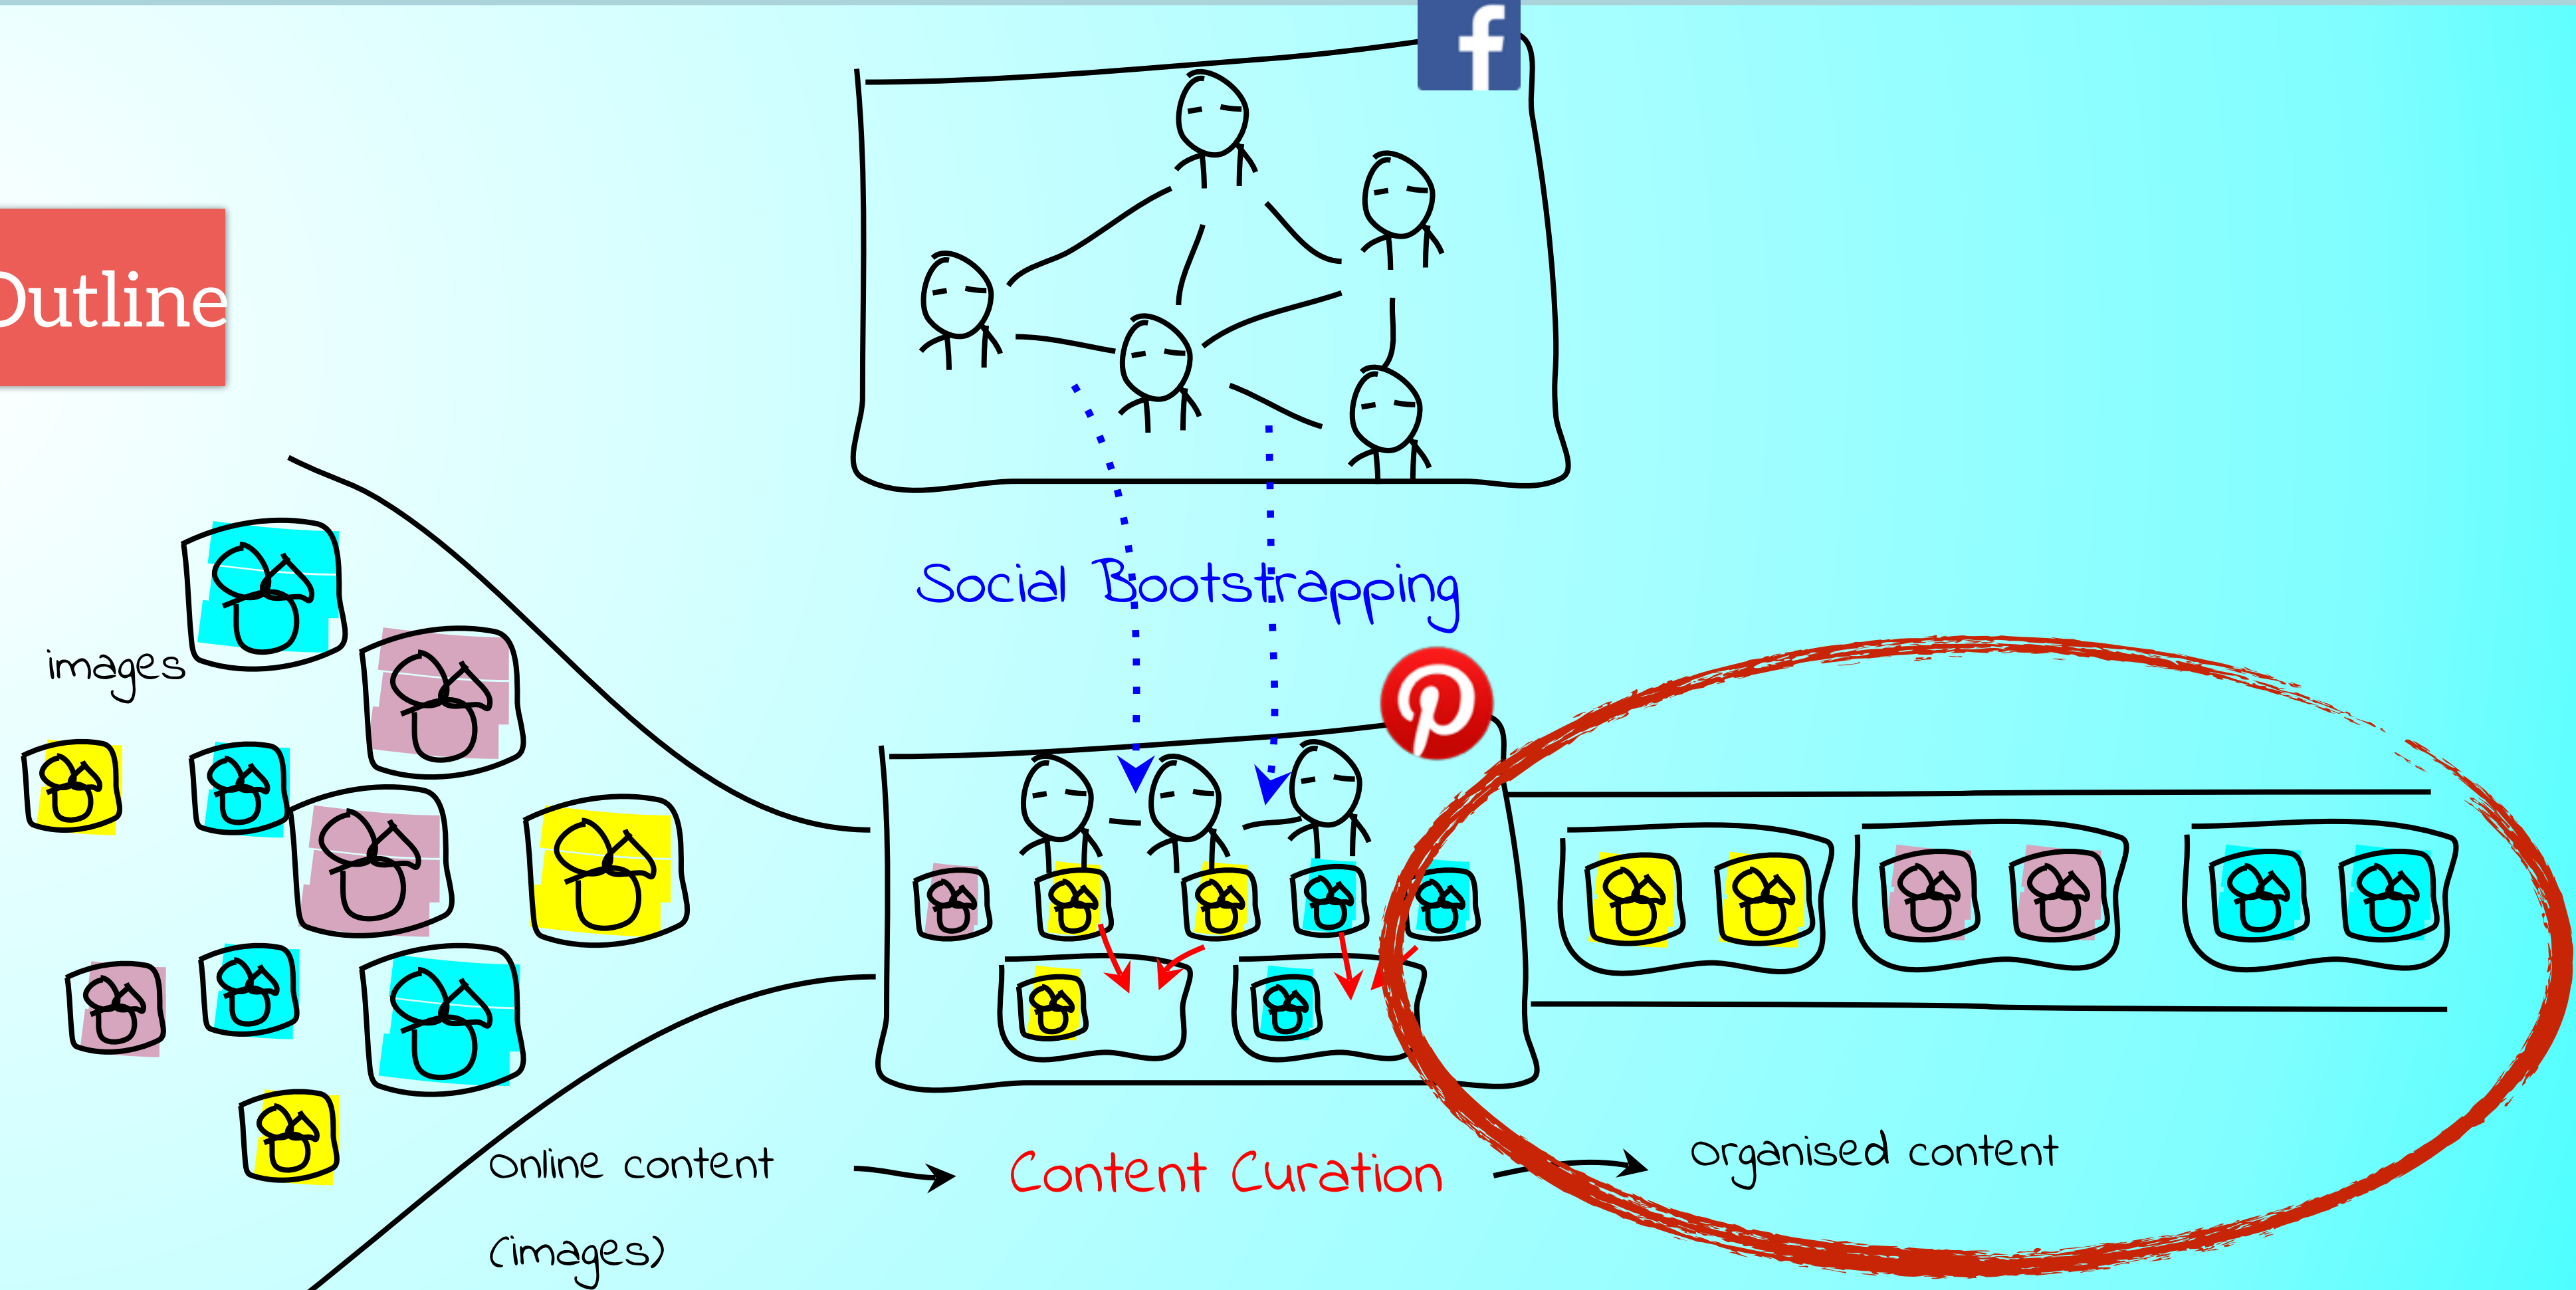

:)

- **Niche but interesting** content highlighted.
- Content are well organised and personalised for each user.

:(

- It is a **manual** process.
- People curate for personal reasons, so is it useful to others??? (mixed picture)

Random Forest Classifier

We look at **images pinned to Pinterest in January, 2013** and obtained more than 5 repins.

214k images

237k users

1.27m repins

Our dataset is available at <http://bit.ly/pinterest-dataset>

Features

Dim Image/Pin (5110)

- Objects recognised by deep learning

e.g. It is a cat.

- Deep Learning Features

i.e. Features from the layer right before the final

- Image Quality

e.g. Contrast, Sharpness, Simplicity

Dim User (1038)

- Profiles

e.g. Activity count, follower count

- Category preference

e.g. I like fashion not technology.

- Object preference (based on deep object detection)

e.g. I like dog not cat.

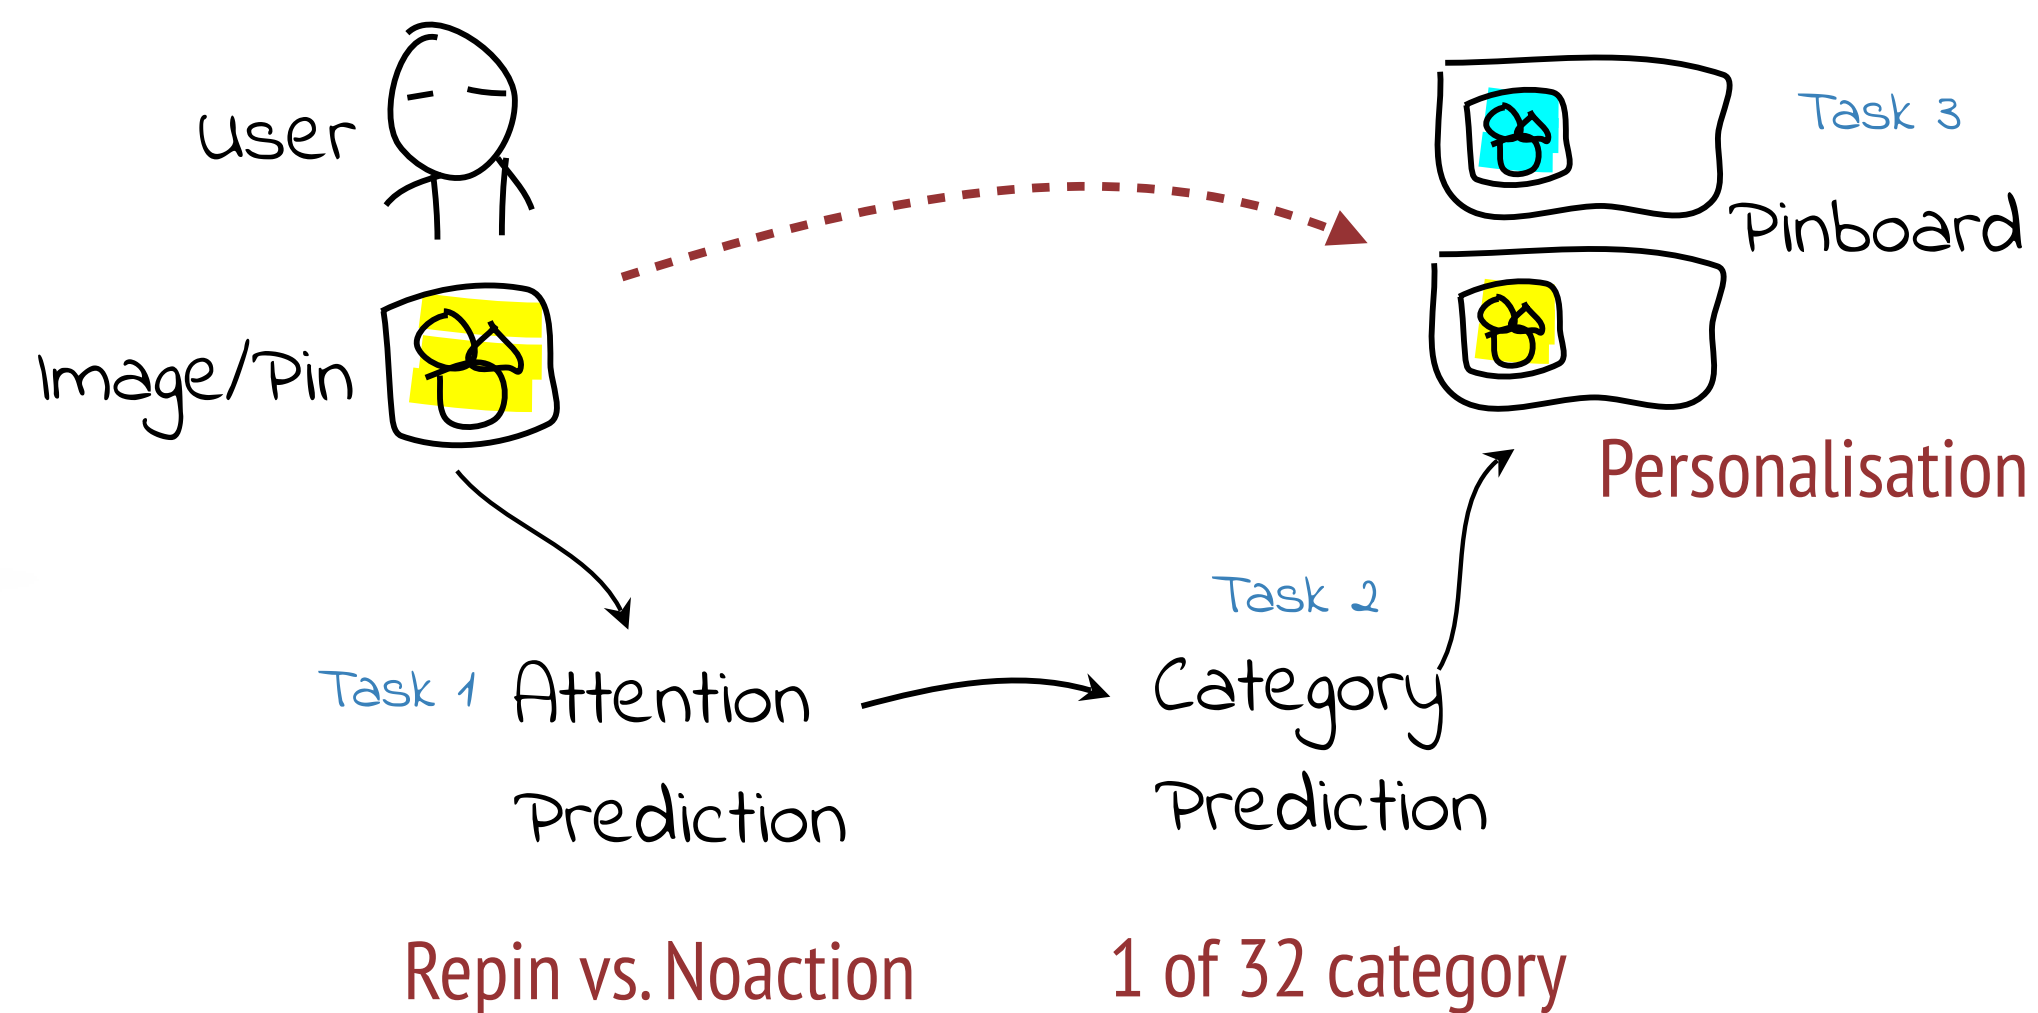

Dim Crowd (5)

- Crowd features

i.e. The majority category among first 5 repiners.
(when majority category of 90% of images appears)

[WWW14]

The Dilemma for New Websites: How to construct social network?

- Option 1:
 - Create entirely new social network
- Option 2:
 - Social Bootstrapping

A screenshot of a traditional login and registration form. It features two yellow input fields at the top: the first is labeled 'Email' with a red 'Required' note, and the second is a password field with masked characters. Below these fields is a link that says 'Are you a business? Get started here'. At the bottom, there is a 'Log In' button and a 'Sign up now' link.

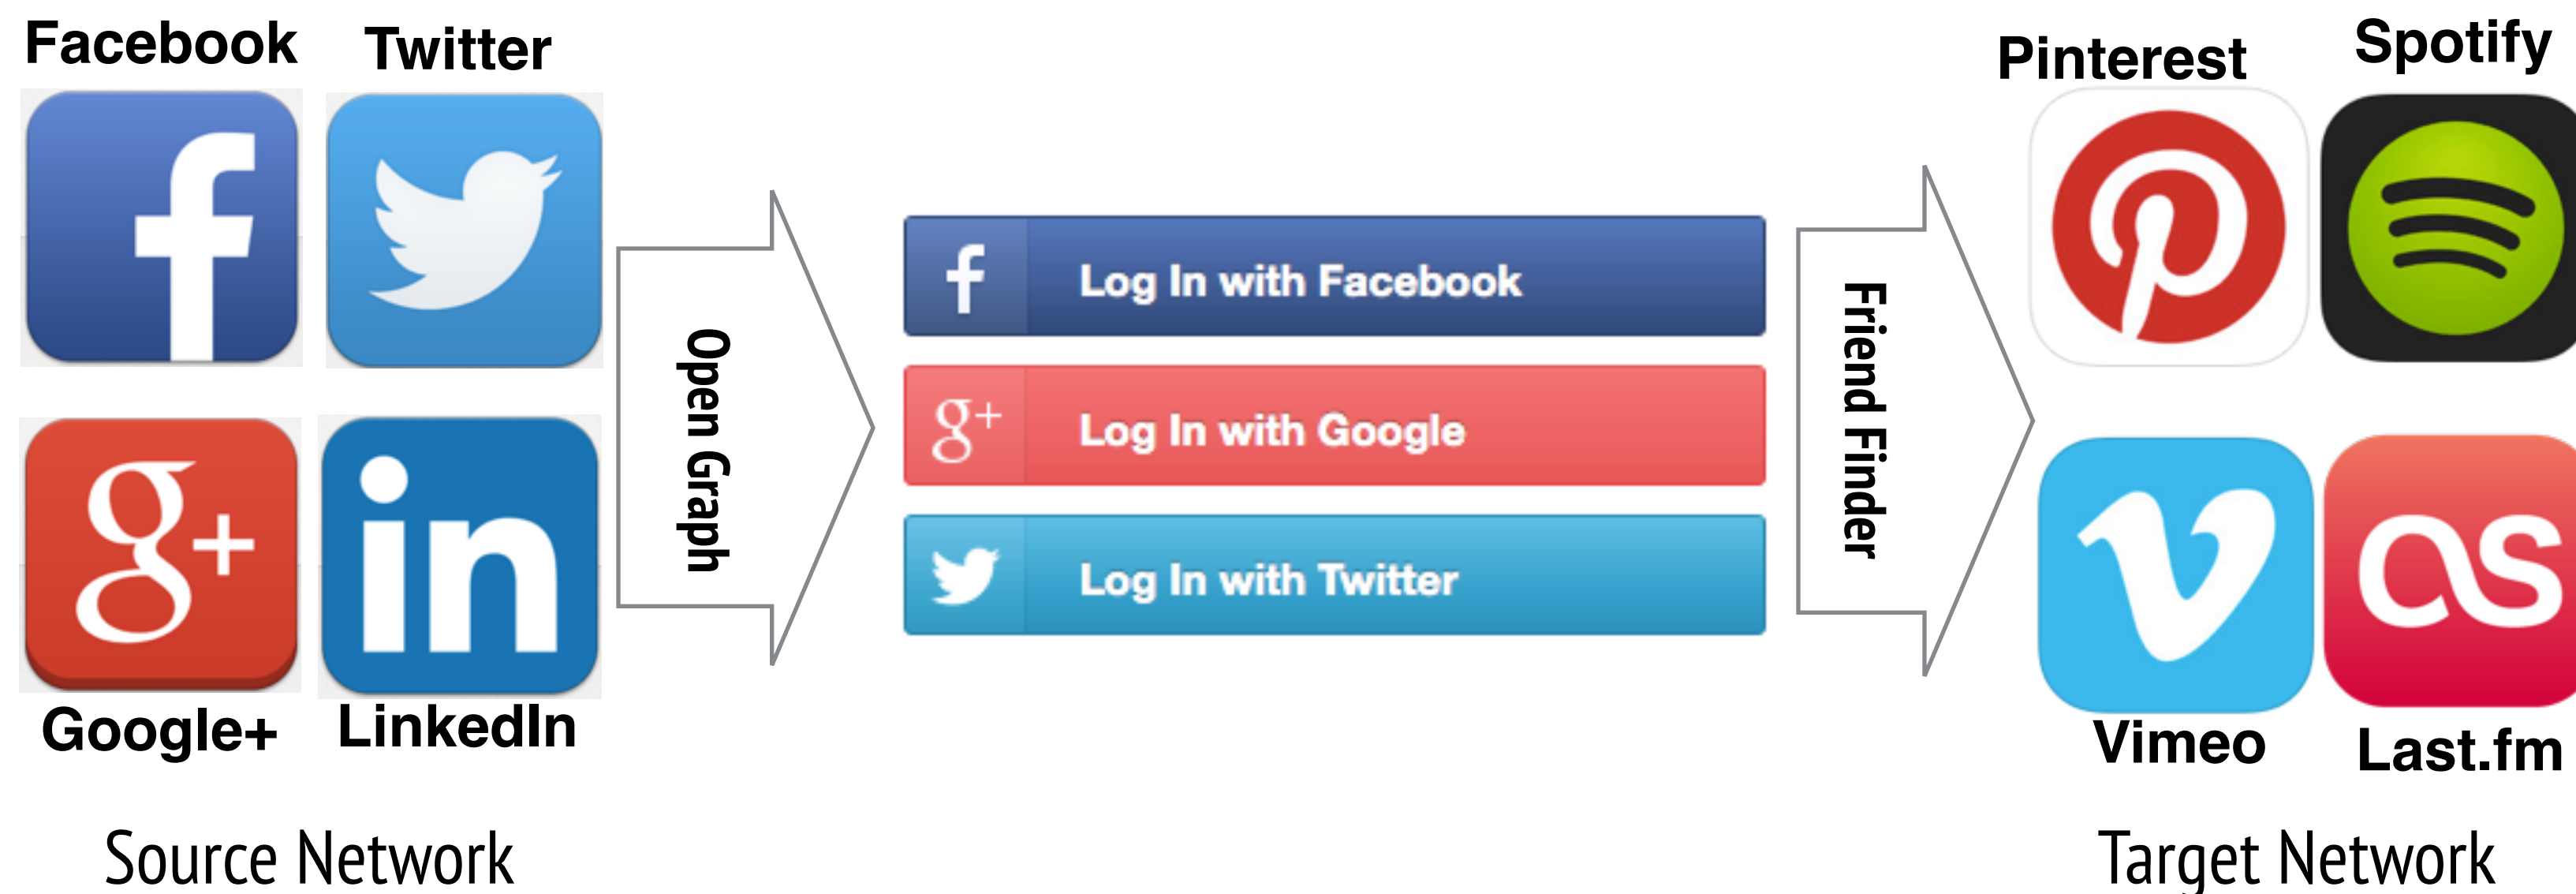

Option 1

A screenshot showing three social login buttons stacked vertically. The top button is blue with the Facebook 'f' logo and the text 'Log In with Facebook'. The middle button is red with the Google+ 'g+' logo and the text 'Log In with Google'. The bottom button is light blue with the Twitter bird logo and the text 'Log In with Twitter'.

Option 2

Social Bootstrapping

- The process of **copying** links from established social networks (*source network*) onto a third-party website (*target network*).

Social Bootstrapping in action: Friend Finder in Pinterest

Social Bootstrapping in action: Friend Finder in Pinterest

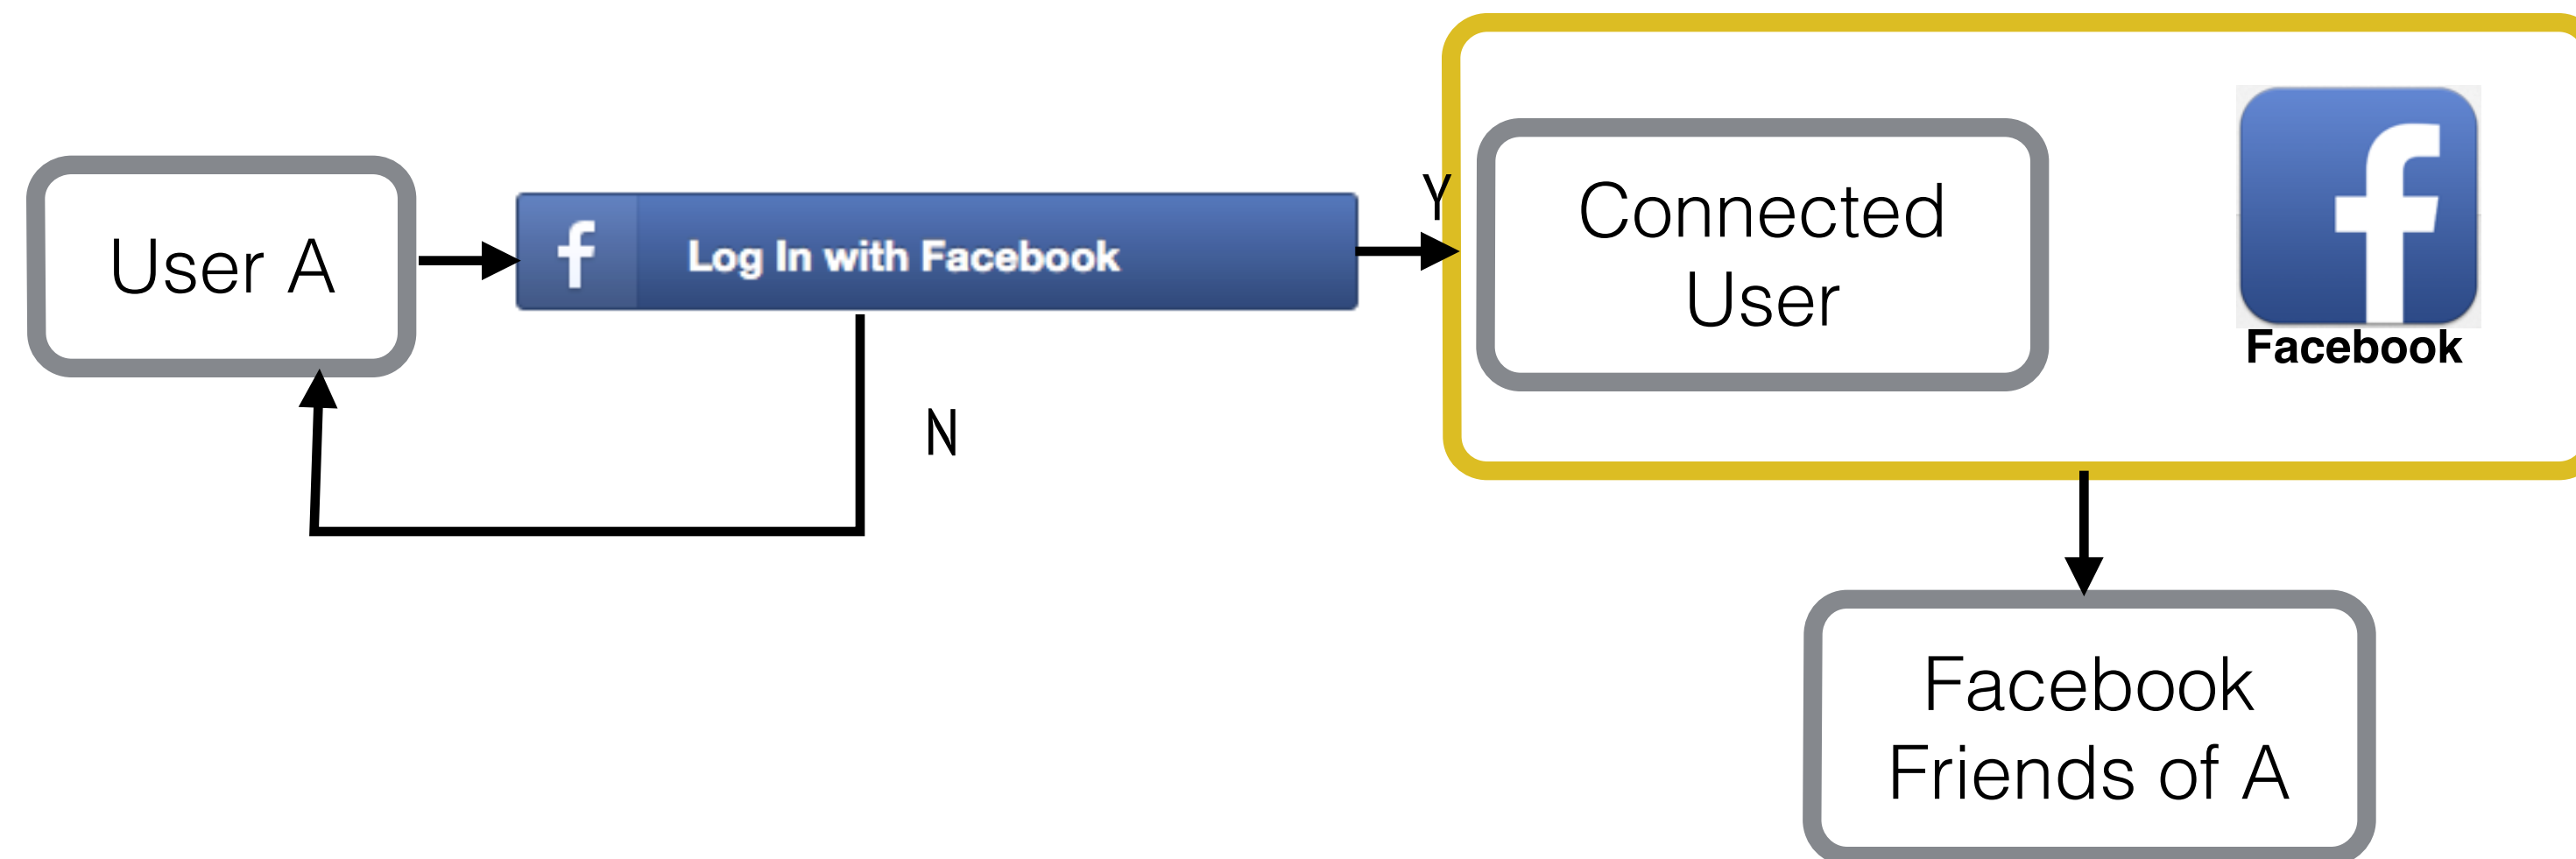

A light gray rounded rectangle with a thin gray border, containing the text "User A".

- **Link sampling:**

- Connected users import friends from source network to target network.

Datasets*: Pinterest

- **Connected users**

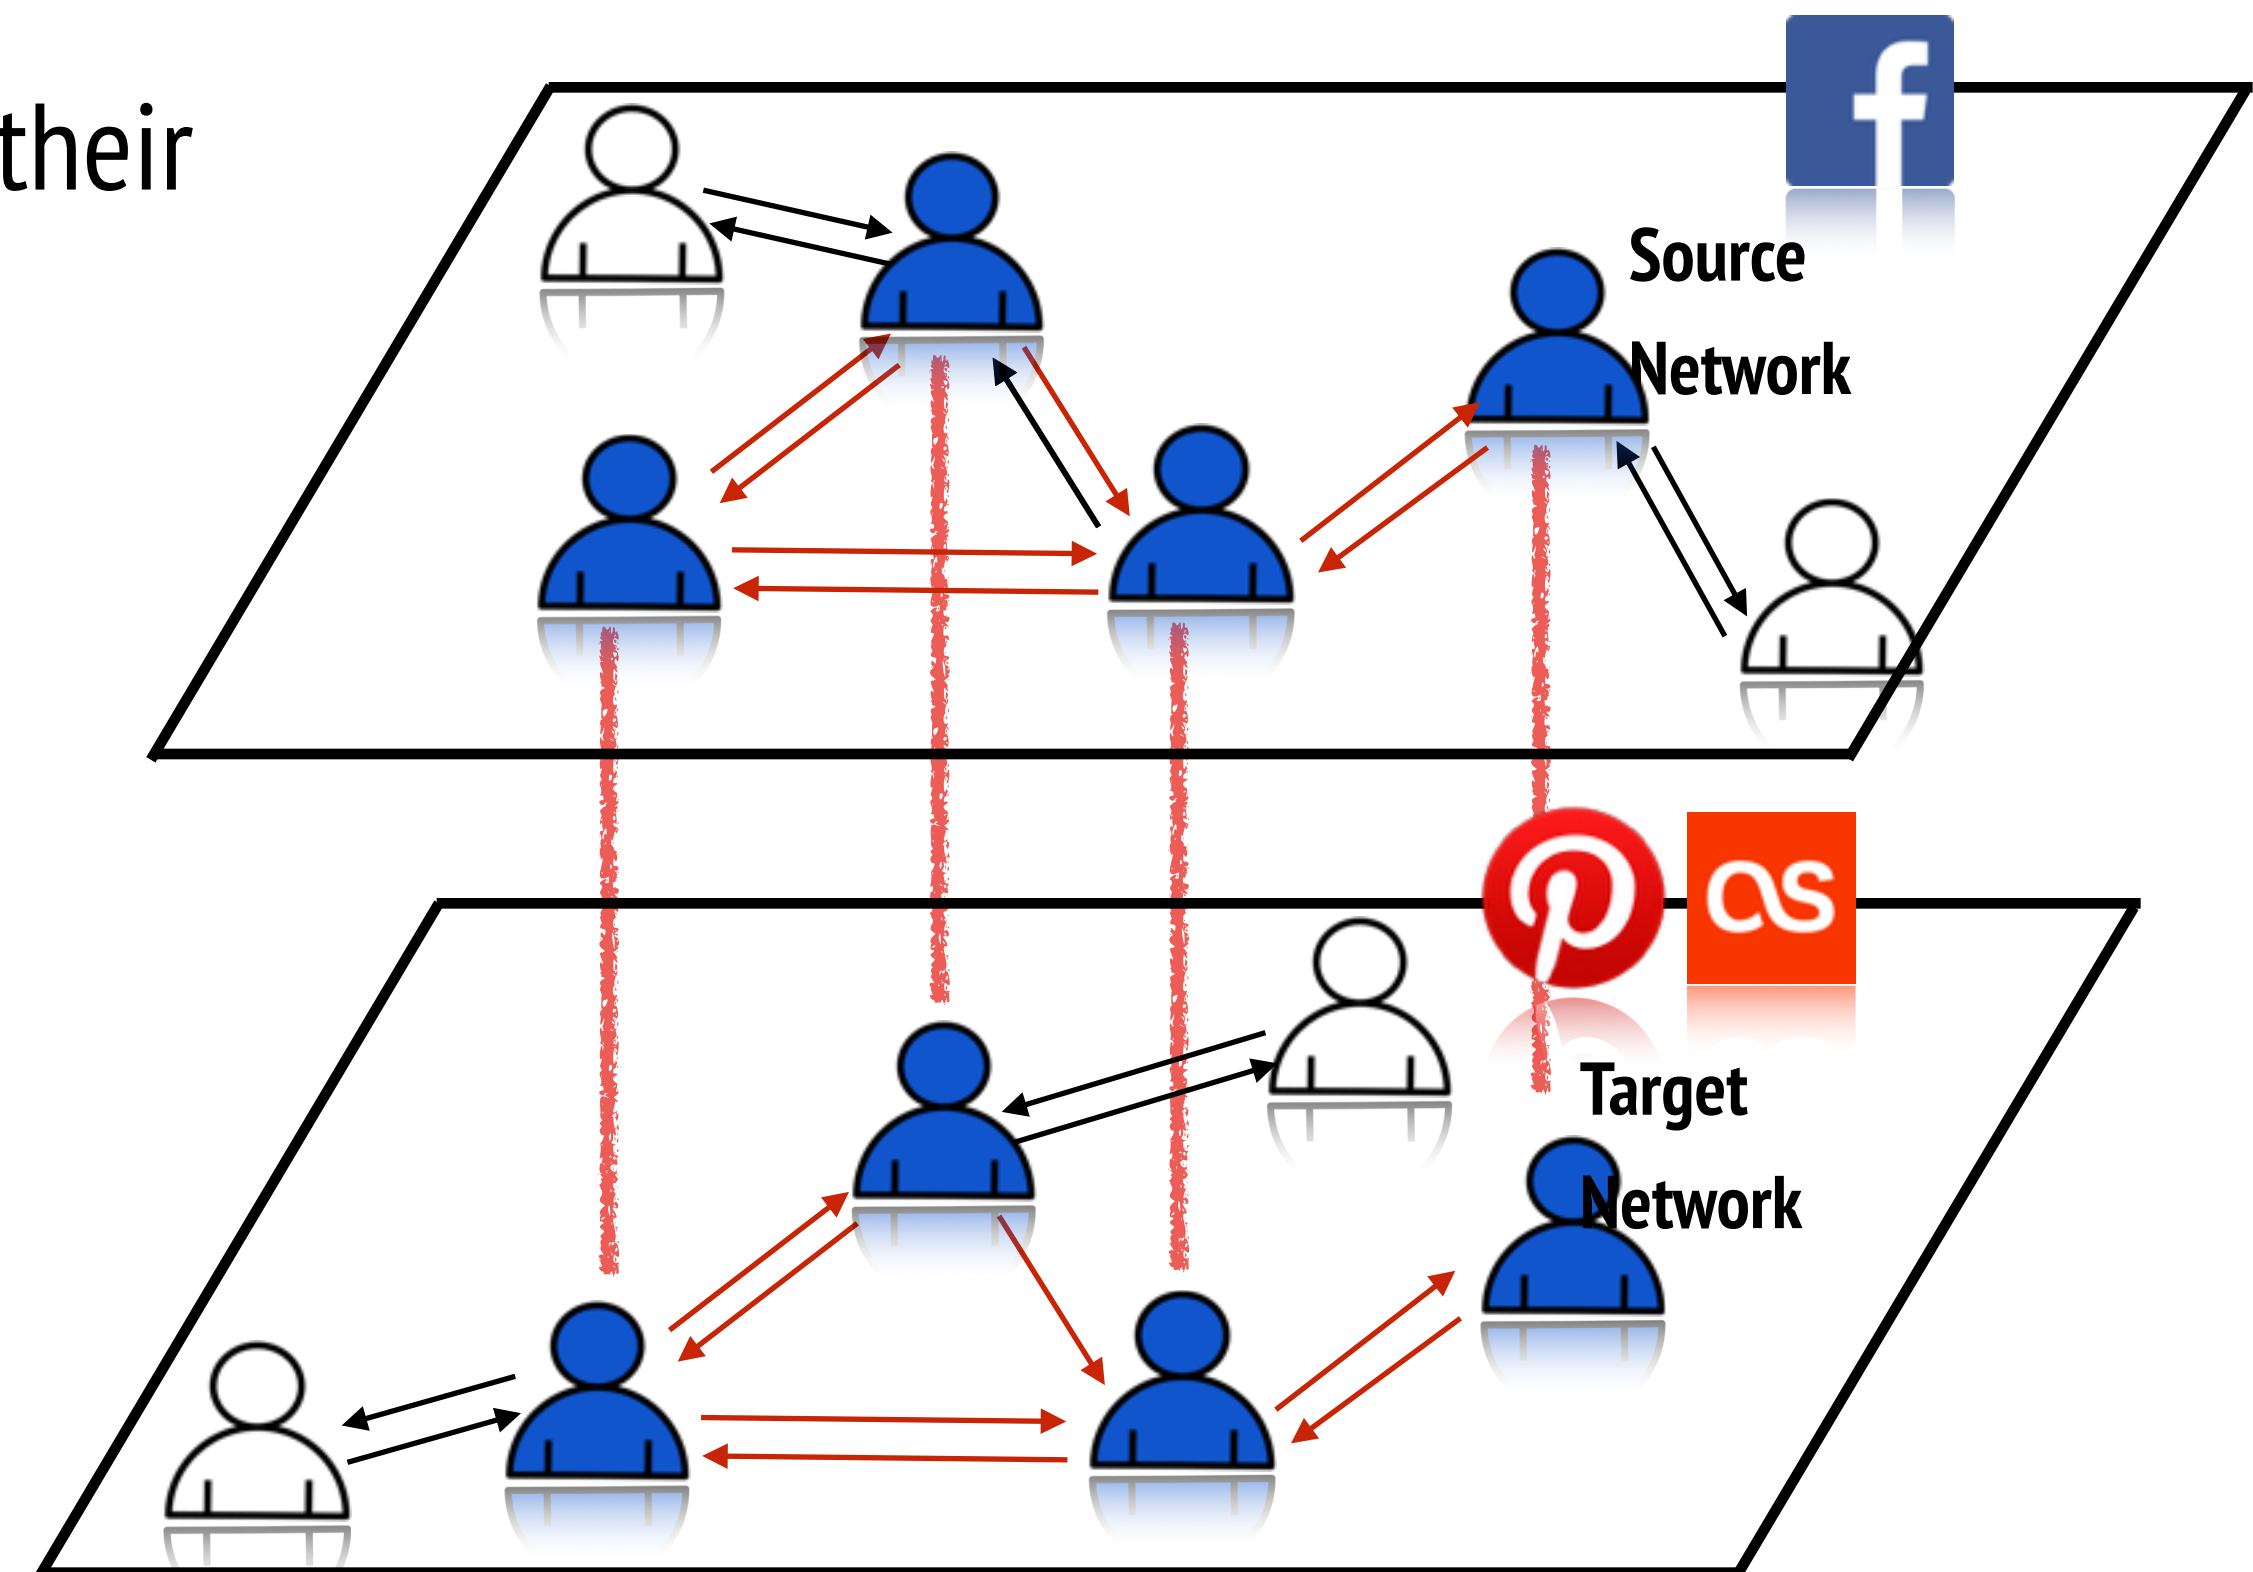

- Users that have connected with their Facebook accounts

 40m / 68m

- **Copied links**

- Links copied from Facebook

 1b / 3.8b

*Our dataset is available at <http://bit.ly/pinterest-dataset>

Social Bootstrapping has advantages on paper

✓ **Can instantly bootstrap from a mature network.**

- Facebook has 10 years of history; Twitter 8 years.¹

✓ **Not “yet another” network fighting for user attention**

- 71% of online adults are now Facebook users²

¹Wikipedia. <http://en.wikipedia.org/wiki/Facebook>, <http://en.wikipedia.org/wiki/Twitter>

Different networks have different purposes

Does copying create a good social community on target website?

General-purpose
Social Networks

Interest-based
Social Networks

Research Questions/Outline

- *Q: Does copying create a good social community on target website?*
- **Structural Benefits:** Copying helps users get started with “good” structure with more social interactions
- **“Weaning”:** Beyond Bootstrapping, active and influential users wean from Facebook to create new links natively

Structural Benefits:

Copied network vs. native network

Our dataset show that:

- **Reciprocity:** *Copied > Native*
- **Clustering:** *Copied > Native*
- **Connectivity:** *Giant Connected Component appears in copied networks quickly (according to our analytical model)*

Structural Benefits:

Copied network vs. native network

Our dataset show that:

- **Reciprocity:** *Copied > Native*
- **Clustering:** *Copied > Native*
- **Connectivity:** *Giant Connected Component appears in copied networks quickly (according to our analytical model)*

Copying links results in a **stronger** and **denser** social structure.

Structural benefits → Social interaction?

- **Repin** (the most popular activity on Pinterest):
 - Put images published by others into one's own collections.
 - Define **Social Repins**: Repins made by friends.
 - Check **Are social repins more on copied or native links?**

Copied links richer in social repins

Copied links richer in social repins

Copying creates networks **good** for social interaction

Research Questions/Outline

- *Q: Does copying create a good social community on the target website?*
- **Structural Benefits:** Copying helps users get started with “good” structure with more social interactions
- **“Weaning”:** Beyond Bootstrapping, active and influential users wean from Facebook to create new links natively

Active/influential users copy less

Is it because active users are less social?

Is it because active users are less social?

Weaning from Facebook

Weaning from Facebook

Why do active/influential users wean from copied to native friends?

Why do active/influential users wean from copied to native friends?

Native friends match user's interests more than friends copied from Facebook

from friends copied from Facebook

Answers to Research Questions

Q: Does social bootstrapping by copying links from Facebook create a good social community on the target website?

- Copying is **useful to initiate social interaction**
- Taking a long-term view, **active/influential users tend to move away** from copied social links and build social relationships natively.

Answers to Research Questions

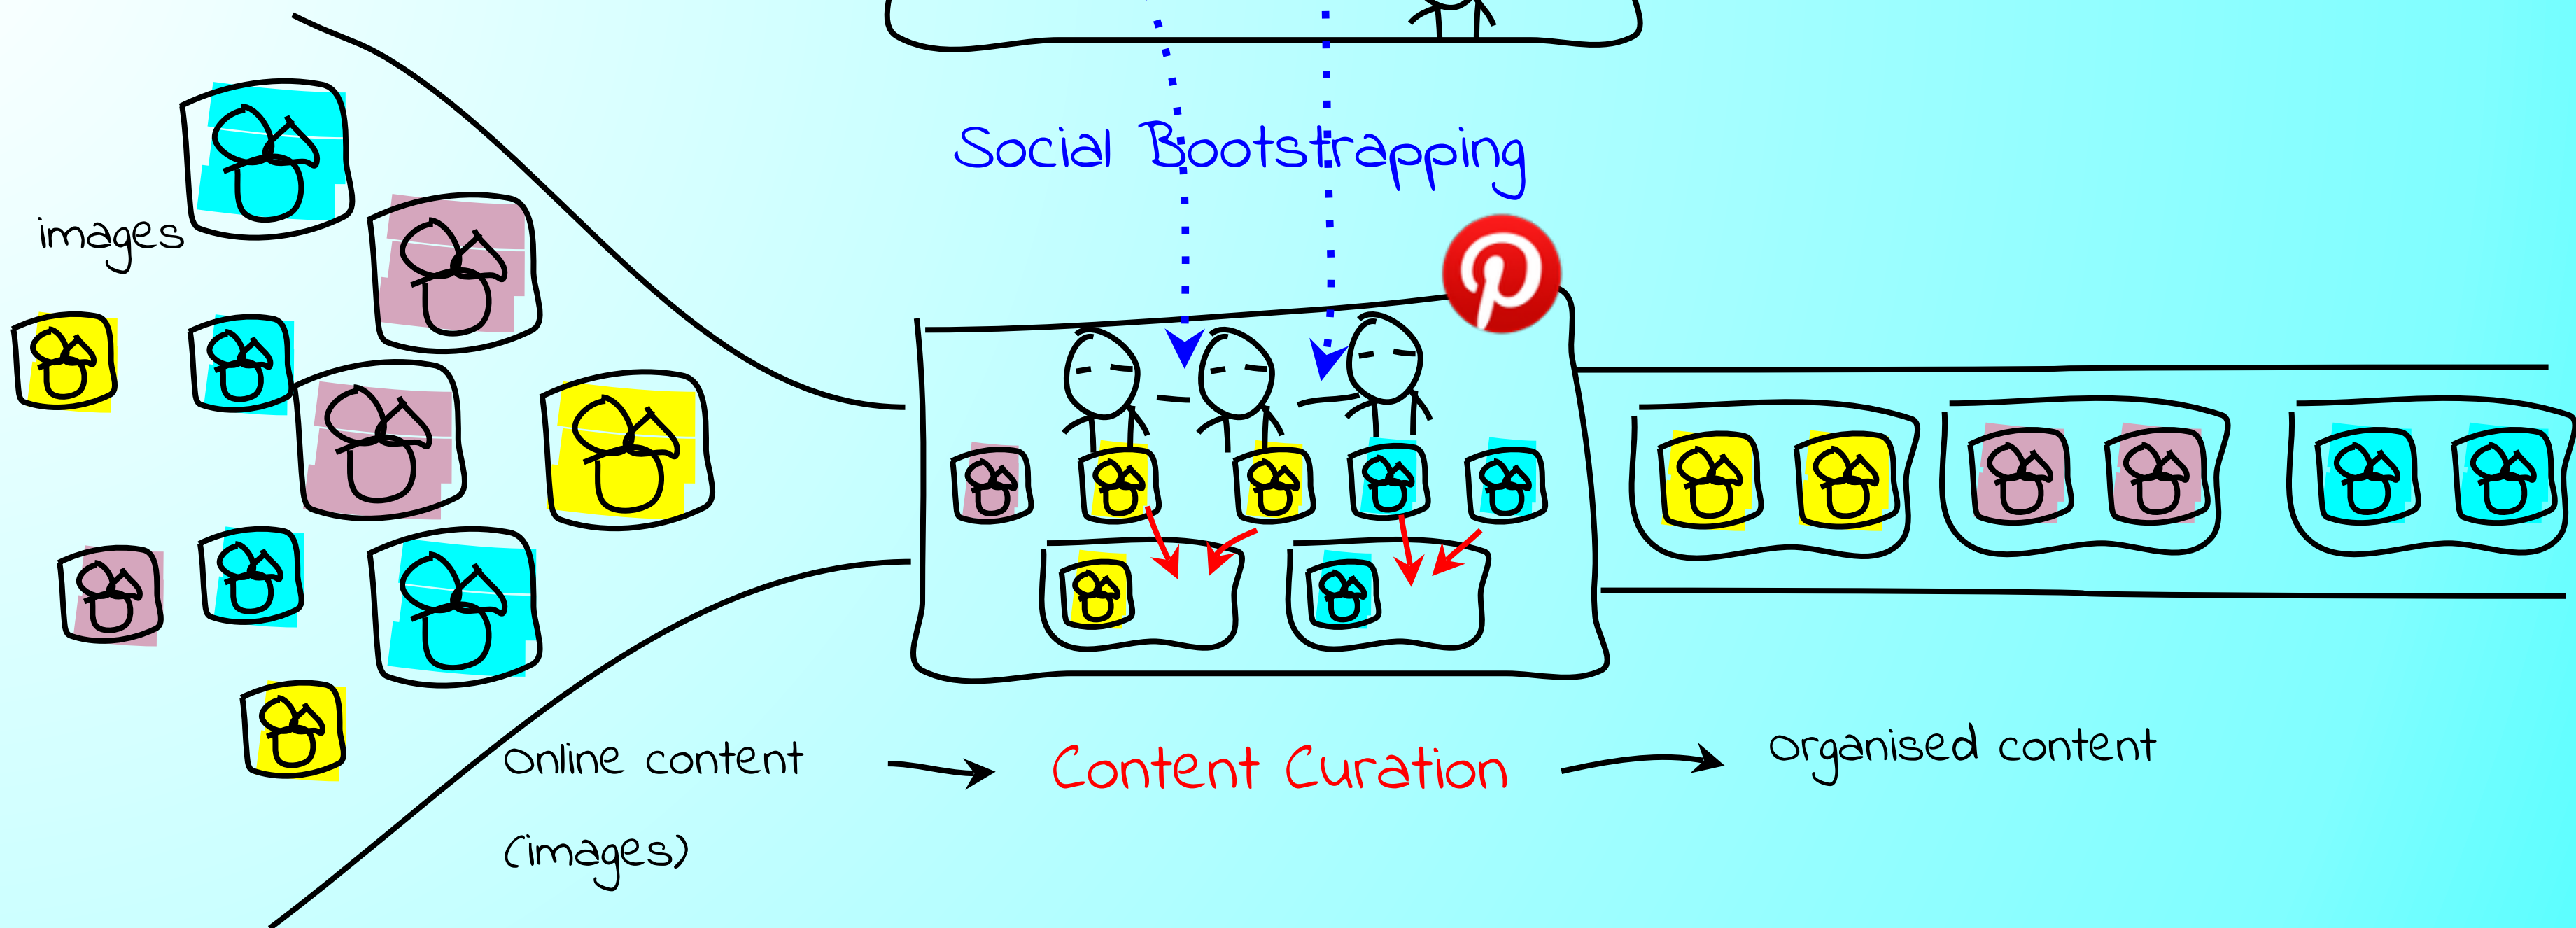

Q: Does social bootstrapping by copying links from Facebook create a good social community on the target website?

- Copying is **useful to initiate social interaction**
- Taking a long-term view, **active/influential users tend to move away** from copied social links and build social relationships natively.

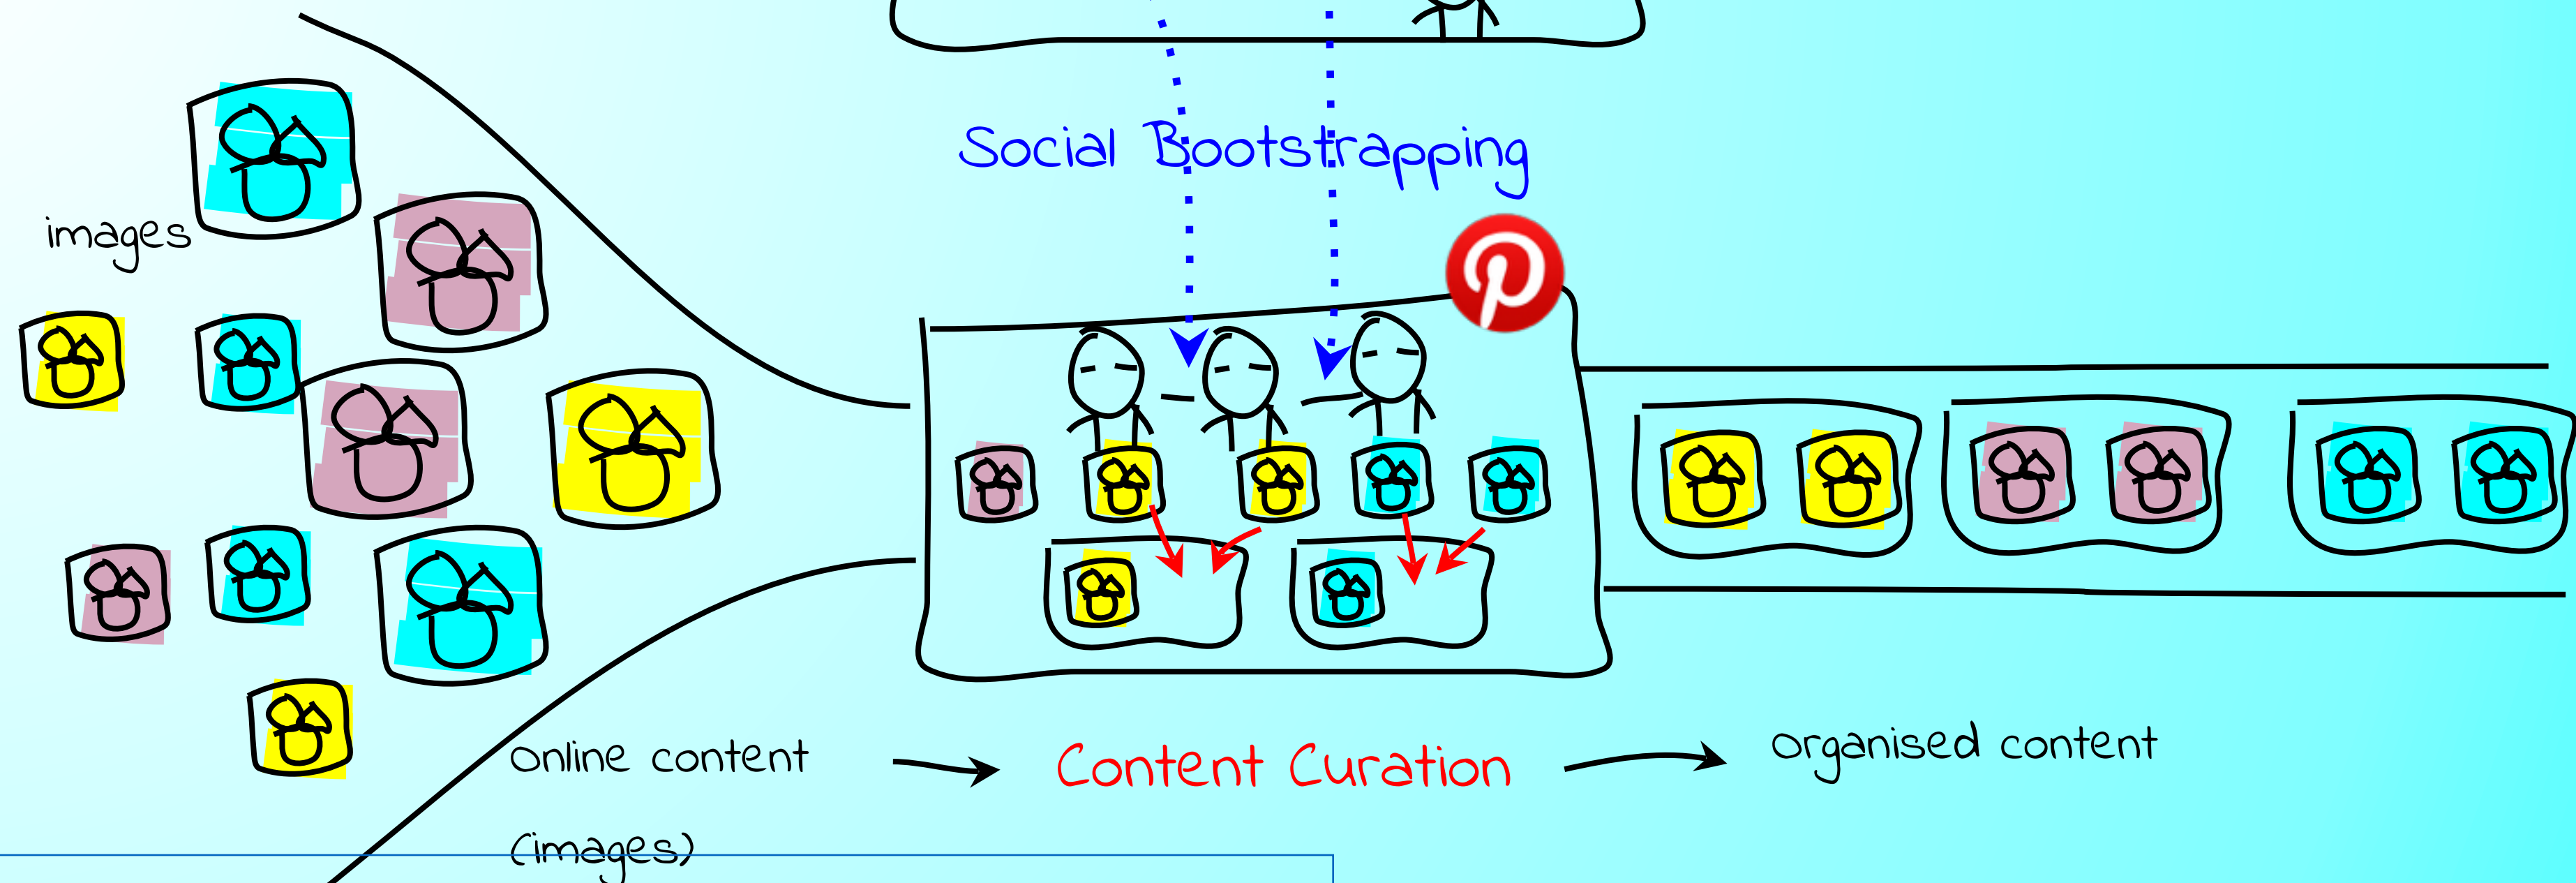

Copying and building links natively are both equally important to the success of target website.
